

CTOUCH[®] Smart innovation!

Q Conferencing

Touch display: Laser^{air}⁺ series
When function matters.

The advertisement features a large touch display set against a cityscape background. On the left side of the display, a young girl dressed as a superhero in a red cape and mask stands with her arms crossed. On the right side, there is a grid of six size options: 55", 65", 70", 75", 84", and 86". A red circular cursor icon is positioned over the 84" option. Below the size grid, there are two rows of icons representing various features and technologies: the first row includes Android, Surface Light Wave, Intel, 32 Point Touch, and JBL Harman; the second row includes a headset, a speaker, Wi-Fi, a camera, and a TV icon. A remote control is shown in the bottom right corner, with red signal waves emanating from it towards the display. The CTOUCH logo is visible at the bottom center of the display frame.

Recessed mounting point

Special mounting space for external devices.

Android 5.0 on board

Empower yourself with instant standalone workforce.

Ambient light sensor

Adaptive screen brightness. Saving energy and money.

WHEN FUNCTION IS KEY!

The CTOUCH Laser air+ is a masterpiece when it comes to craftsmanship, technology and making touch accessible to the world. Integrating innovations like uWand and Beacon receivers, opening a complete new and unique experience in a touch world. The technology embedded in the uWand interactive gesture remote giving users' fluid and accurate direct control, turning into an intuitive hybrid controller. Joining forces with partners like JBL®, integrating sound designed, tuned and built by Harman, providing unprecedented audio. Take meetings into a new dimension. Experience the JBL Audio System, an amazing JBL designed speaker system for the CTOUCH Laser air+. You've never experienced high-output audio like this from a touchscreen display!
