

Lifesize® Third-Party Device Registration

Welcome to the meeting!

Bring the Lifesize experience to your third-party devices

More and more organizations are moving to cloud services to reap the benefits of improved efficiency, flexibility and reduced costs. The shift from traditional IT to the potential capabilities of the cloud can be challenging, especially as you transition from existing infrastructure. With Lifesize Third-Party Device Registration, you can enjoy the benefits of the Lifesize cloud-based service while maximizing your current video conferencing investments. Connect your global and mobile workforce, and increase employee engagement, collaboration and productivity.

Make meetings easy for everyone

Third-party devices no longer sit on the sidelines but are a part of the Lifesize ecosystem. Create a more productive, collaborative environment and meeting experience by registering your existing room systems to the Lifesize service.

Enhanced conference room experience

Streamline and enhance all of the different ways your teams communicate with the cloud-based platform from Lifesize. Registered third-party devices can meet with guests, Skype for Business® users, nonregistered third-party devices, and Lifesize clients and room systems in a Lifesize virtual meeting room.

Reliable, safe and secure

Go ahead and discuss top-secret information in confidence because we're powered by IBM® Cloud, which means your conversations are always encrypted.

Dual stream video

See every face and reaction. Present on one screen while still seeing the meeting participants on the other.

Directory provisioning

Done with dial strings? Make quick calls with the centralized, search-based Lifesize directory.*

Automatic NAT/firewall traversal

Take IT complexity out of the meeting room. That's right, no configuration needed.

*Coming soon for supported Cisco devices
